These 8 Simple Questions will Ensure Your Success Building Business Credit”

Dear Friend,

There are simply too many people who hire business credit building companies that are not happy with the results. Before choosing another company, if you ask these 8 questions you will be assured that you will be working with a legitimate company who can help you build business credit.

Why is it so important to work with a knowledgeable advisor? Why can't you do it on your own? The Fair Credit Reporting Act does not apply to the business credit bureaus, this means that if you make a mistake, skip a step, try and take a short cut your business credit file can be "Red Flagged. This means your company is prohibited from receiving credit.

There is a proven step-by-step process that MUST be followed if you plan on properly building your business credit. If you don't follow the proven process then you can be put into the "High risk" category. When that happens, no lending institution will lend your business money and there is nothing you can do to remove it.

Make sure to choose a honest credit building company that has the knowledge, experience and proven systems to support you, before you decide whom you will work with, make sure to ask them these 8 vital questions.

Question #1:

Will I be obtaining only trade credit or CASH credit?

Be careful, there are a number of companies out there that will only help you obtain trade credit. Trade credit can only be used with the individual creditor, and no where else. This is great if you need \$3000 of paper products, but is useless if you need money to invest, cover business expenses or expand your company.

8 vital questions you must ask before choosing a business credit company

And if it is CASH credit, will I always need to personally guarantee the application?"

If the company says you will always have to personally guarantee all types of credit -- then you are NOT receiving the full benefit of business credit. Keep in mind, our solution will introduce you to lenders who will not require a personal guarantee, however these vendors will still be checking your personal credit and need your social security number. They do this to stay in banking compliance.

Question #2:

Will a trained coach show me, step by step, how to incorporate my business and build business credit?

My guess is that if you wanted to figure out the intricacies of Incorporating your business, and building corporate credit on your own ... you would already have done so. (I've done it. And believe me ... this is NOT stuff you want to muddle through on your own.)

So if you won't be receiving step-by-step instructions supported by a trained credit coach, resulting in a predicable successful outcome, call another company. (We spell out each step in our proven system for securing cash lines of credit without personal guarantee in crystal clear detail).

Question #3:

If I get stuck while I'm taking all those necessary steps, will I have to pay you hundreds or even thousands to help me figure it out?

Many companies charge low fees up front and continue to tack on heavy, additional charges each time you call or write for help.

Not us! We deliver everything you need to know to secure cash lines of credit without a personal guarantee. You will have access to a dedicated coaching advisor and we place no limits on how often you can speak with them.

Question #4:

Will I have the ability to set up my credit files, and monitor the development of my business credit score with all major business credit agencies all within your coaching platform?

I can save you some time on this one; we are the **ONLY** company in the entire industry that has a data feed relationship with the business credit bureaus. This means, when you have a new trade line reporting to your Experian file, for example, our system data feeds with Experian directly and we are notified immediately. We then update your coach and then update you to the progress you are making and the business credit asset you are developing. If they can't do the same, run the other way. Why work with an advisor who is trying to blindly lead you!

Question #5:

When companies promise to get you cash Credit, ask them this pointed question: "What type of paperwork is required to get cash lines of credit?"

Beware of companies that say it is not required to furnish financial statements, tax returns, business plans, bank statements, etc. to obtain financing without a personal guarantee. When it comes to getting approvals for cash credit without a personal guarantee, you will need to show that your company is financially responsible and you do this by showing it earns revenue, pays its bills on time and has established a good business credit file.

If the company tells you that you can obtain this type of financing without providing real documents, don't bother working with them, they are not being honest.

Think about it, is a lender really going to give you hundreds of thousands of dollars without a personal guarantee without you having to show them that you are a "safe-risk?" We will show you exactly what you need to do in order to become a safe risk and secure this type of financing.

Question #6:

How are your coaches paid?

This is a really important question! How would you like to work with someone that could care less if you obtain the financing you desperately need? We are the ONLY company in the industry that pays are coaches based on 3 factors:

- Customer satisfaction survey every 60 days
 - »» This means that if you are not happy with your coach, you will have the chance to let us know and we will dock they pay!
- Client success of the program
 - »» The more successful you are, the more the coach gets paid!
- Actively calling the client every 13 days as a minimum
 - »» That's right, if the coach ever goes longer than 13 days without reaching out to you, they will lose a big chunk of their pay!

Question #7:

When it comes time to apply for financing, are you going to pass me off from lender to lender?

This is another very important question. Virtually every other credit building company will, when it is time to apply for financing, pass you off to one lender to apply, and then tell you to go and apply at the next lender and so on. They literally end up sending you on a wild goose chase and just hope that one of the lenders can obtain financing for you. Does this sound like something a real business credit and financing expert would do?

Well, we don't! In fact, we are the ONLY company that has 19 business lending programs programmed into our online client platform. In other words, we know each of the lenders underwriting criteria and as you are going through the platform with your certified business credit coach, you will automatically be prequalified for individual financing products.

8 vital questions you must ask before choosing a business credit company

Not only that, but since we know you already pre-qualify we also automatically fill out the lending application for you! This means that the system will help you identify which lending options are a good fit for your business, fill out the application for you, and then, when you hit accept, automatically submit the lending request directly to the lender. All you have to do is wait for a call and finalize the loan request!

Question #8:

“What kind of a guarantee do you offer?”

It’s critical to get the specifics about guarantees. Because most companies that offer guarantees or promise only that your corporation will get a 80+ Paydex score. While this is a start, it’s not good enough --

If after completing our Business Credit Builder Program, you are not fully satisfied and/or have not obtained the following, we will extend your coaching program and access to the Business Credit Development Platform for up to an additional 12-month at no additional subscription cost.

1. Corporate Compliance and documentation review
2. D&B file and a D&B rating
3. D&B Paydex Score
4. Business credit file with Corporate Experian with an intelliscore
5. Business credit file with business Equifax with the appropriate business credit score.
6. Trade accounts and/or Vendor Accounts with and without a personal guarantee.
7. A Business Credit Asset™ that can be used to leverage financing opportunities
8. Access to a dedicated funding advisor for the next 5 years.

This is not, by any means, a comprehensive list of all the questions entrepreneurs should ask when it comes to building corporate credit. But if you address these costly and dangerous errors, you will be on your way to building a safe, secure, and financially sound business—the business you always dreamed of!

8 vital questions you must ask before choosing a business credit company

Hopefully, these 8 questions will help ensure that you work with a credit building company that will be honest, upfront as well as help you successfully establish your business credit and leverage it into new financing opportunities for your business.
